DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 12 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of “the period of the data writing process and the data erasing process, the period of the data erasing process”, in claim 12 and 14, are confusing. Does applicant mean “the period of the data writing process, the period of the data erasing process”?

Claim Rejections - 35 USC § 103

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
4. Claims 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshihara (Pub. No. US 2002/0000960) in view of Miyazawa (US Patent No. 5,731,794).

As to claims 11, 13, Yoshihara a liquid crystal display device comprising: an active matrix panel; a liquid crystal having spontaneous polarization, sealed in the active matrix panel

Art Unit: 2674

(see Figs. 2 and 3); and a writing/erasing unit for displaying an image on a frame by frame basis by repeating a data writing process (e.g. writing scan, Fig. 12) and a data erasing process (e.g. erasing scan, Fig. 12) for the active matrix panel; wherein one frame time comprising a period (writing period 1.4ms, Fig. 12) of the data writing process, a period (erasing period 1.4, Fig. 12) of the data erasing process and a period (e.g. lighting period 2.8ms, Fig. 12) during which neither the data writing process nor the data erasing process is performed. It is noted that Yoshihara discloses using color light sources for creating color image in the LCD display. Yoshihara does not specifically disclose using an active matrix panel having a coloring member and using a single white light source for creating color image on the LCD.

Miyazawa is cited to teach a color LCD display can be either using color light sources (Fig. 2) or using color member (e.g. color filters) with a white light source (see Fig. 11). It would have been obvious to one of ordinary skill in the art to have modified Yoshihara with the features of using color filters as taught by Miyazawa so that the plurality of light sources can be replaced by a single light source and the backlight control circuit can be simplified.

As to claims 12, 14, Yoshihara as modified discloses a back-light for irradiating white light on the coloring member; and a back-light controller for controlling the back-light to be turned on or off according to the period of the data writing process, the period of the data erasing process, and the period during which neither the data writing process nor the data process is performed (see Fig. 12 of Yoshihara).

Response to Arguments

5. Applicant's arguments with respect to claims 11-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
